CAREER OBJECTIVE

I am a results-driven Software Engineer and Computer Science graduate with hands-on experience in full-stack web development, software engineering, data analytics, machine learning and IT systems support.

My technical experience spans frontend and backend development using JavaScript, React, Node.js, PHP, Python, HTML, CSS and SQL, with practical experience working with MySQL and MariaDB databases. I have developed and maintained web-based applications, database-driven systems, predictive analytics solutions and interactive dashboards from development through testing and deployment.

My broader technical background includes IT infrastructure, networking, systems troubleshooting, website administration and digital operations. I have also gained practical experience through freelance software engineering assignments, independent software projects and open-source contribution.

Strong in software development, problem solving, debugging, database management, technical troubleshooting, Git-based development workflows and translating user requirements into practical technology solutions. I am seeking a Software Engineer opportunity where I can contribute to building reliable, scalable and user-focused software products.

KEY COMPETENCIES

- Software Engineering
- Full-Stack Web Development
- Backend Development
- Frontend Development
- Web Application Development
- Database Design & Management
- REST API Development
- Software Debugging & Troubleshooting
- Object-Oriented Programming
- Application Testing & Maintenance
- PHP & MySQL Development
- JavaScript Development
- Python Development
- React & Node.js

- Git & GitHub
 - Data Analytics & Visualization
 - Machine Learning
 - Technical Problem Solving
 - IT Infrastructure Support
 - Network & Systems Support
 - Requirements Analysis
 - Code Maintenance & Refactoring
-

TECHNICAL SKILLS

PROGRAMMING LANGUAGES: JavaScript | Python | Java | C | C++ | PHP | SQL | HTML5 | CSS3

FRAMEWORKS & LIBRARIES: React | Node.js | Express.js | Bootstrap

DATA & MACHINE LEARNING: Pandas | NumPy | Scikit-learn | Power BI | Matplotlib

DATABASES: MySQL | MariaDB

DEVELOPMENT TOOLS & PRACTICES: Git | GitHub | Docker | Postman | Visual Studio Code | XAMPP | REST APIs | Debugging | Code Refactoring

CLOUD & SYSTEMS: AWS | Microsoft Azure | Linux | Windows | cPanel | TCP/IP | LAN/WAN Networking

WORK EXPERIENCE

P.C.E.A. KIMBO PARISH

Full-Stack Developer | May 2025 – Present

Worked on the design, development, maintenance and improvement of web-based digital solutions for the parish, combining frontend development, backend programming, database management and deployment.

✓ Designed and developed responsive web interfaces using React, CSS3, JavaScript and Bootstrap, ensuring usability across desktop and mobile devices.

✓ Developed server-side functionality using PHP, implementing application logic, form processing and database-driven functionality.

✓ Designed and managed MySQL databases for storing, retrieving and managing application and website data.

- ✓ Connected frontend interfaces with backend functionality and databases to deliver dynamic web applications.
- ✓ Developed and maintained website features based on organizational requirements and user needs.
- ✓ Implemented database-driven forms and workflows for collecting, processing and managing information.
- ✓ Diagnosed and resolved frontend, backend and database-related issues to maintain reliable application functionality.
- ✓ Collaborated with parish leadership and users to understand requirements and translate operational needs into practical digital solutions.

UPWORK — REMOTE SOFTWARE ENGINEERING CONTRACT

Junior Software Engineer | February 2026 – July 2026

Worked remotely on short-term software development assignments secured through Upwork, contributing to the development, maintenance and improvement of web-based applications.

- ✓ Developed and modified web application features based on client requirements and project specifications.
- ✓ Built and updated responsive frontend interfaces using React, JavaScript and Bootstrap.
- ✓ Developed backend functionality using PHP, including server-side processing, form handling and application business logic.
- ✓ Created and modified MySQL database tables, queries and data-handling functionality to support application requirements.
- ✓ Implemented CRUD functionality for managing application records and user-generated data.
- ✓ Investigated and resolved frontend, backend and database-related bugs reported during development.
- ✓ Integrated frontend components with backend functionality and database operations to ensure reliable application data flow.
- ✓ Conducted functional testing and debugging to verify new features before delivery.

REMOTE OPEN-SOURCE CONTRIBUTOR (SELF-DIRECTED)

Global Open-Source Community | January 2026 – Present

Contributed to open-source software projects through documentation, issue resolution, code improvements and community-oriented development activities.

- ✓ Authored comprehensive README guides, setup documentation and API usage examples for open-source backend starter templates, improving project clarity and developer onboarding.
 - ✓ Triageed community-reported issues on GitHub repositories and submitted targeted pull requests addressing UI rendering bugs and backend logic errors.
 - ✓ Refactored existing sections of code to improve readability, maintain clean coding practices and enhance overall application maintainability.
 - ✓ Reviewed existing project structures and identified areas where documentation and implementation could be improved.
 - ✓ Used Git and GitHub workflows to manage contributions, commits, issue discussions and pull requests.
-

KENYA AIRPORTS AUTHORITY — WILSON AIRPORT

IT Intern | May 2024 – August 2024

- ✓ Monitored and maintained routers, switches and firewalls supporting the airport's ICT environment and contributing to stable network connectivity.
- ✓ Supported backup and recovery procedures to strengthen data resilience and operational continuity.
- ✓ Managed ICT equipment and software inventory, improving asset tracking and departmental visibility.
- ✓ Diagnosed and resolved hardware and software issues for end users, developing practical systems troubleshooting and technical support skills.

MINISTRY OF LABOUR AND SOCIAL PROTECTION

Enumerator & Data Analyst | September 2024 – November 2024

- ✓ Cleaned, validated and analysed field-collected data to produce reliable inputs for social protection systems.

✓ Registered household data through structured interviews and community sensitization on the ESR system.

✓ Compiled digital records and technical summary reports for ministry review.

INDEPENDENT ELECTORAL AND BOUNDARIES COMMISSION (IEBC)

Election Clerk | July 2022 – August 2022

✓ Operated KIEMS kits for voter registration and identity verification during a national election.

✓ Handled electronic transmission of election results while following secure data-handling protocols.

PROJECTS

CAR PARK MANAGEMENT SYSTEM

PHP | MySQL | JavaScript | HTML | CSS

Developed a smart parking management system incorporating parking allocation, QR-based ticket generation, payment processing and an administrative dashboard.

GitHub: github.com/BenNganga/CarParkManagementSystem

HOSPITAL APPOINTMENT MANAGEMENT SYSTEM

PHP | MySQL | JavaScript

Developed a web-based hospital appointment management solution designed to streamline appointment booking and administrative operations. Used PHP, MySQL and JavaScript throughout the application.

GitHub: github.com/BenNganga/HospitalAppointmentsSystem

EMPLOYEE LEAVE MANAGEMENT SYSTEM

PHP | MySQL | JavaScript | Bootstrap

Developed a web-based employee leave management system to streamline leave applications, approvals and HR administration.

GitHub: github.com/BenNganga/EmployeeLeaveManagementSystem

SALES ANALYTICS DASHBOARD

Python | Power BI | Pandas | SQL

Developed an interactive sales analytics dashboard for analysing sales performance, revenue trends and customer behaviour.

GitHub: github.com/BenNganga/SalesAnalyticsDashboard

CUSTOMER CHURN PREDICTION

Python | Scikit-learn | Pandas | NumPy

Developed a machine learning application for identifying customers likely to discontinue a service.

GitHub: github.com/BenNganga/CustomerChurnPrediction

HOUSE PRICE PREDICTION

Python | Scikit-learn | Pandas | Matplotlib

Developed a machine learning application for predicting house prices using property-related features.

GitHub: github.com/BenNganga/HousePricePrediction

VOLUNTEER EXPERIENCE

P.C.E.A. KIMBO PARISH

Volunteer Head of IT Department | 2022 – Present

✓ Lead and coordinate the parish IT department, supporting day-to-day digital operations and technical activities.

✓ Maintain IT infrastructure including PA systems, CCTV security systems and parish networks.

- ✓ Provide technical troubleshooting and support for hardware, software, networking and digital systems.
 - ✓ Lead and mentor junior IT department members on system maintenance, troubleshooting and digital operations.
-

EDUCATION

CATHOLIC UNIVERSITY OF EASTERN AFRICA

Bachelor of Science in Computer Science — Second Class Lower

September 2021 – March 2025

KOMOTHAIR BOYS HIGH SCHOOL

Kenya Certificate of Secondary Education (KCSE) — Grade B

January 2017 – November 2020

CERTIFICATIONS

- **Introduction to Cyber Security** — Cisco Networking Academy, August 2026
 - **Product Development Pathway** — IBM SkillsBuild, August – September 2026
 - **AI Safari Program Certificate** — AI Safari Program, May – August 2026
 - **HCIA Certification** — Huawei, 2024
 - **Basics of Network Layer Protocols** — Huawei, 2025
 - **Graphic Design Certification** — Ajira Digital Program, 2022
-
